Dear Mr. Wilson:

SUBMITTAL OF DOUBLE-SHELL TANK EMERGENCY PUMPING GUIDE REVISION

Reference: Ecology letter from J. Ayers to R. J. Schepens, ORP, and E. S. Aromi, CHG,
"Double Shell Tank Emergency Pumping Guide Inspection Close Out Letter," dated
January 30, 2003.

58697

This letter transmits the revised Double-Shell Tank Emergency Pumping Guide, HNF-3484, in accordance with the referenced letter. Ecology requested that the Emergency Pumping Guide be revised by May 30, 2003, and include:

1. Revision to Appendix F to reflect the current storage locations of the flex jumpers stored in the 2101-M warehouse; and
2. Revise the guide to allow pumping to any tank suitable of holding the emergency pumped waste.

The requested information has been incorporated into the guide and the draft revision was provided to Ecology staff on May 1, 2003. Ecology staff have reviewed the draft and on May 13, 2003, and provided comments. Ecology's comments have been incorporated and the revised emergency pumping guide is attached.

If you have any questions, please contact Lori A. Huffman, Environmental Division,
(509) 376-0104.

Sincerely,

James E. Rasmussen, Director
Environmental Division
